►NEW	670		Helen Corbitt's Greenhouse cookbook, 1994.		

## GENERAL NOTES ON EVALUATING EXERCISE 1

1. The code a in RULES and CRC indicates a heading using earlier rules, not suitable for use on a fully evaluated AACR2 bibliographic record.
2. Use the addition (Restaurant) to indicate corporateness, AACR2 24.4B1, but not the location for a restaurant, unless the database has a conflict.
3. Optional for NACO: Make a linking reference with \$wnnaa to show pre-AACR2 heading is not a valid reference.
4. Delete 410 1 Arlington...; LCRI 26.3A7, xref through place is for government bodies.
5. Delete 550 Restaurants...; MARC 21 AF 550 blue page, do not use in NARs; Z1 yellow page 5xx, routinely delete all subject-to-name references when changing a record for another reason.
6. Name in 1xx appears in new 670 \$a; no \$b needed.

### GENERAL NOTES ON EVALUATING EXERCISE 2:

1. *The code b in RULES and CRC indicates an AACR1 heading, not suitable for use on a bibliographic record without full evaluation; LCRI 26, Reference Evaluation.*
2. *Usage on both the original and the newer items is J.R. Jones, which doesn't match the AACR1 1xx.*
3. *The date 1842- is so long ago that we'd expect it to be b. 1842, but with the death date available, we'll include both dates.*
4. *Make a cross reference using the fuller form of name, since the "primary elements" are different, and include full dates to match 1xx; LCRI 26.2, Referring from Variant Forms, 2)*
5. *Optional for NACO: Include a 4xx linking reference to the earlier heading, using the \$w control subfield. The string is similar to the new 4xx Jones, John Robert, but contains only the birth date, not the full dates, so normalization is not a problem.*
6. *Adjust the fixed field codes as needed.*

College of Commerce. \$a Western Kentucky University. College of  
Commerce. \$a SUBJECT ENTRY: Works about this bodies are entered under  
the name used during the latest period covered.¶

---

**GENERAL NOTES ON REF. EVAL. EXERCISE 3:**

---

*NACO participants are required to evaluate this AACR2 NAR only if they need to add new information or if the heading doesn't accurately represent the piece. LCRI 26.3B-C discusses reference evaluation in detail. This record includes three different names of the College of Commerce and needs more than one NAR. In all of them:*

*Sequence of names:*

*1922 College of Commerce of Bowling Green Business University*

*1963 College of Commerce of Western Kentucky State College*

*1966 Western Kentucky University, the College of Commerce*

- 7. Delete ending punctuation from 1xx, 4xx, and 5xx fields; Z1 Yellow pages 1xx, 4xx, 5xx*
- 8. Delete 410 1 Bowling Green, Ky. \$b College of Commerce, because there's no need for a reference traced through place.*
- 9. When making NARs for a sequence of names, include earlier and later cross references only for forms of the name which were in use immediately before or immediately after the 1xx form of name; LCRI 26.3B-C, See Also References, p. 1*
- 10. Convert the information in the 665 to a 667, giving only as much as each NAR needs to justify 1xx heading and cross references; 26.3B-C, See Also References, 3) Procedures*
- 11. Add a 670 for the new item which prompted reference evaluation to the NARs which include that name. The new 670 may not belong on all NARs in the sequence; Z1 Yellow pages, 670, General.*

Reference Evaluation Exercise

- 12. *If there are many earlier forms of name, consider whether a NAR is needed for each form of name for publications in the database, or if the earliest form of name should be a 4xx variant on the nearest NAR.***
- 13. *Each name in this group is a 24.13, type 5 subordinate body. The parent bodies must be established.***
- 14. *Adjust the fixed field codes as needed***
